Product Change Notice

Notice: #032619

Change to Pin Radius for Maxi, Mini and Micro Package Modules

To Our Valued Customer:

We appreciate your use of Vicor products. Our commitment to customer satisfaction is demonstrated by our notification to you of the following change.

Description:

The following change impacts all Maxi, Mini and Micro package modules. A tooling change that was required to manufacture pins for these modules has resulted in a slight increase to the radius on the top of the pin. This slight change to the form of the pin does not impact fit or function and should allow for easier insertion of the pins into sockets and printed circuit boards.

The dimension differences in inches and millimeters are as follows:

	inches	millimeters
Previous Pin Radius Specification	0.015 MAX.	0.38 MAX.
New Pin Radius Specification	.025 +/- 0.015	0.64 +/- 0.38

Products Affected:

All Maxi, Mini, and Micro DC-DC Bricks, FIAM, MicroRAM, ARM, ENMod, FARM and M-FIAM modules.

Schedule:

This change is effective immediately.

Data sheets for all affected products will be updated by April 30th, 2019.

Actions Required:

Customers should review data sheets for specification changes, and contact applications with any questions.
